

STATE OF OHIO  
2007 AIR MONITORING SITE REPORT

PREPARED BY

David Ambrose  
AIR QUALITY AND ANALYSIS UNIT  
DIVISION OF AIR POLLUTION CONTROL  
OHIO ENVIRONMENTAL PROTECTION AGENCY

## **ACKNOWLEDGEMENT**

The Air Monitoring Section of the Ohio EPA Division of Air Pollution Control, would like to thank all the following Local Air Agencies and District Offices whose cooperation and review made this report a reality.

Akron Regional Air Quality Management District, Akron, Ohio

Canton City Health Department, Air Pollution Control Division, Canton, Ohio

Hamilton County Dept. of Environmental Services, Air Quality Programs, Cincinnati, Ohio

Dept. of Public Health & Welfare, Division of Air Quality, Cleveland, Ohio

Lake County General Health District, Air Pollution Control, Painesville, Ohio

Mahoning-Trumbull APC Agency, Youngstown, Ohio

Portsmouth Local Air Agency, Portsmouth, Ohio

Regional Air Pollution Control Agency, Montgomery County Health Dept., Dayton, Ohio

City of Toledo, Division of Environmental Services, Toledo, Ohio

Ohio EPA, Central District Office, Columbus, Ohio

Ohio EPA, Northeast District Office, Twinsburg, Ohio

Ohio EPA, Northwest District Office, Bowling Green, Ohio

Ohio EPA, Southeast District Office, Logan, Ohio

Ohio EPA, Southwest District Office, Dayton, Ohio

## Introduction

This is the sixth edition of the Ohio Air Monitoring Site Report which updates the 2001 edition and presents the monitoring network in operation as of May 2007. It contains tabular listings by county and map depictions of all Ohio air monitoring sites that have operated at any time since January 1, 1990.

Information presented for the ambient air monitoring sites is grouped according to the Local Air Agencies (LAA) and District Offices (DO) in Ohio. The current list and jurisdiction of these Local Air Agencies and District Offices can be seen on page 2.

County maps depicting the active and discontinued air monitoring sites were developed using two ESRI Geographical Information System (GIS) software programs namely ArcMAP and ArcView. These county maps have been arranged alphabetically within each LAA and DO.

Active sites and discontinued sites are shown on each map by use of the following map legend:

- Air Monitor Site
- ▲ Active (Red triangle)
- ▲ Discontinued (**Black** triangle)

Monitoring site data are provided in tables and are group by county name. These data include the AQS nine-digit site identification number, street address, UTM (Universal Transverse Mecator) coordinates (meters), pollutants sampled, probe heights, period of operation and operating agency. Sites operated by private industry are included and indicated. The sites are arranged in AQS numerical order and are numbered for map location purposes.

The site coordinates given in this report and which formed the county maps are based on the Universal Transverse Mecator (UTM) geographical system. For each position there is a zone, and an easting and northing coordinates. The eastings represent a measurement of East-West position in meters. In Ohio, these East-West position measurements are found within two spatial zones. The northings represent a measurement of North-South map position. The two zones in Ohio are Zone 16 which is found in the western most portions of Ohio and Zone 17 which includes the rest of state. Site coordinates in future editions of this report will be reported in latitude/longitudes rather than UTM's.

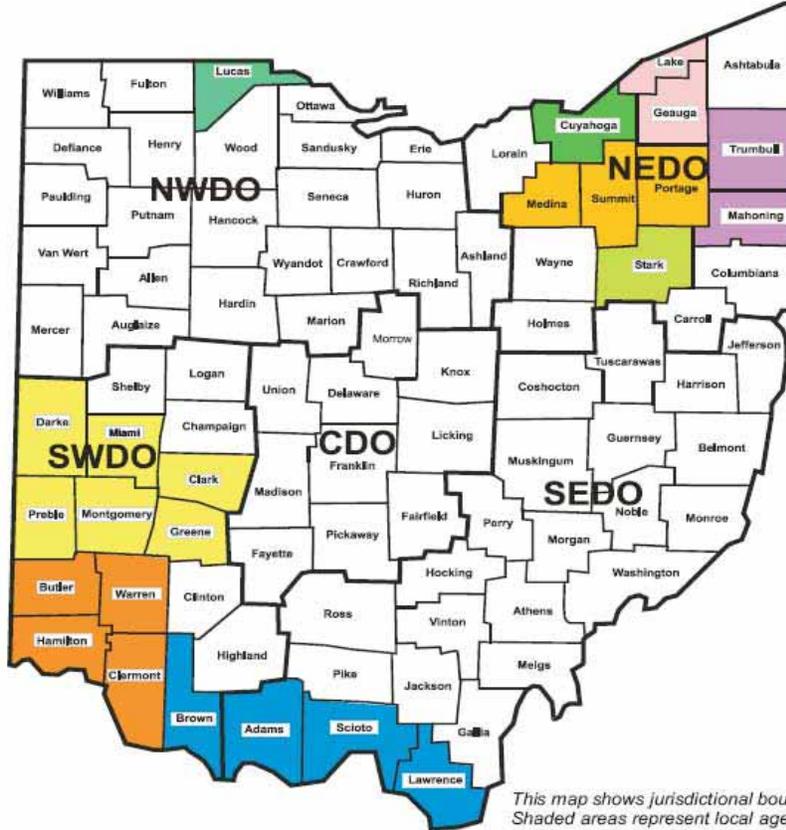

Since the publication of the 1995 edition, one of the original local air agencies in Ohio, the North Ohio Valley Air Authority (NOVAA) became disbanded. The counties which were part of their jurisdiction were divided between two District Offices of the Ohio EPA. Columbiana and Carroll counties were part of the NE District Office. Jefferson, Harrison, Belmont and Monroe counties were made part of the SEDO jurisdiction. The maps for these counties will show a numeric labeling of the discontinued NOVAA sites and an alphabetic labeling of those sites operated by either NEDO or SEDO.

Questions regarding the information contained in this report can be addressed by contacting Dave Ambrose, Air Monitoring Section at 614-644-3620.

Air monitoring data can be requested from Dave Ambrose at [david.ambrose@epa.state.oh.us](mailto:david.ambrose@epa.state.oh.us) or Gary Engler at [gary.engler@epa.state.oh.us](mailto:gary.engler@epa.state.oh.us). Ambient air quality data can be obtained from the US EPA AQS database by logging onto their web site: [www.epa.gov/air/data/index.html](http://www.epa.gov/air/data/index.html).

## Glossary

### General Terms

AQS	Air Quality System-a computer database system administered by the U.S. EPA. AQS is repository of ambient concentrations of air pollutants and associated meteorological data as well as the software to add and maintain this data.
UTM	Universal Transverse Mercator-a coordinate system (like latitude/longitude) utilized in determining locations on U.S.G.S. topographical maps.
UTM Zone	Identifies the zone of the UTM System in which a site is located. Ohio is part of two zones, 16 and 17.
UTM Easting	Describes the easting UTM coordinate in meters (i.e., distance from the reference edge of the UTM zone) for the site.
UTM Northing	Describes the northing UTM coordinate in meters (i.e., for the Northern Hemisphere, the distance from the equator.
Inst. Type	Instrument type used to collect air monitoring samples
Hi-Vol	High Volume Sampler- Air monitoring instrument used to sample large volumes of air for the collection of particulate matter of different aerodynamic sizes.
Cont.	Abbreviated for all continuous air monitoring instruments which produce hourly readings.
TA300SEQ	A PM <sub>2.5</sub> instrument that collects a 24-hour sample. Collects samples every day or every third day or every sixth day depending upon the sample frequency requirement at the monitoring site.
R&P Cont.	A PM <sub>2.5</sub> instrument that collects hourly PM <sub>2.5</sub> readings.
TA-Cont.	A PM <sub>2.5</sub> instrument that collects hourly PM <sub>2.5</sub> readings.
CSPEC	Chemical speciation PM <sub>2.5</sub> data collection monitor.
Canister	A stainless steel storage container used in collecting air toxics data such as volatile organic compounds.

General Terms (cont'd)

Probe hgt.(mts.)      Probe height in meters above the ground.  
Grn. Elev. Msl      Ground elevation in meters above mean sea level.

Pollutant Parameters

Parm.	Parameter
	represents the pollutant/meteorological variable monitored
TSP	Total suspended particulates
PM-10	Particulate matter less than 10 microns
PM <sub>2.5</sub>	Particulate matter less than 2.5 Microns
Pb	Lead
SO <sub>2</sub>	Sulfur dioxide
CO	Carbon monoxide
NO	Nitric oxide
NO <sub>2</sub>	Nitrogen dioxide
O <sub>3</sub>	Ozone
WS	Wind Speed
WD	Wind Direction

Agency Names (Abbreviations)

Akron	Akron Regional Air Quality Management District
Canton	Canton City Health Dept., Air Pollution Control
