Re: Request for Review and Approval of the Revised Toledo Area Maintenance Plan Approval for the 1997 Eight-Hour Ozone Standard

Dear Administrator Hedman:

I am writing to formally request review and approval of a revision to the maintenance plan for the Toledo area ( Lucas and Wood Counties) with respect to the 1997 eight-hour ozone standard. Ohio EPA submitted a redesignation request and maintenance plan for this area on December 22, 2006. U.S. EPA approved this requests on August 9, 2007 (72 FR 44784).

Ohio EPA is now requesting a revision to the maintenance plan to update mobile emission projections and conformity budgets based on emission rates generated from U.S. EPA's latest mobile emissions model, the Motor Vehicle Emission Simulation (MOVES) 2010. In December 2009, MOVES replaced MOBILE6.2 as the U.S. EPA's official emission factor model. The area is still attaining and maintaining the 1997 8-hour ozone standard and the point, area and non-road emissions have not changed significantly and did not need to be updated for this submittal.

The enclosed information was compiled by Ohio EPA, Ohio Department of Transportation, and Toledo Metropolitan Area Council of Governments. The public hearing for this package was held on April 9, 2013 in Toledo, Ohio. No testimony was provided, nor were any comments received.

This submittal consists of one (1) hard copy of the required documentation. An exact duplicate electronic version of the submittal in PDF format is available at <http://epa.ohio.gov/dapc/SIP/1997.aspx> under the heading "Redesignations and Maintenance Plans".

Administrator Hedman
