**Re: Ohio Sulfur Dioxide (SO<sub>2</sub>) Infrastructure SIP**

Dear Administrator Hedman:

I am writing to confirm that the State of Ohio continues to retain the resources necessary to evaluate ambient air quality, develop plans to attain new and existing ambient air quality standards, run a complete new source review program, and effectively enforce all applicable requirements. As outlined in the attached infrastructure state implementation plan (iSIP), Ohio EPA can implement and satisfactorily complete the Section 110 requirements for all current and any future National Ambient Air Quality Standards (NAAQS). Specifically, the State of Ohio is submitting this documentation to address the iSIP requirements for the 2010 Sulfur Dioxide (SO<sub>2</sub>) national ambient air quality standard (NAAQS) and in accordance with the "Guidance on Infrastructure State Implementation Plan (SIP) Elements Under Clean Air Act Sections 110(a)(1) and 110 (a)(2)" (draft as of February 19, 2013).

Enclosed with this letter you will also find the public hearing notice for the public hearing and comment period process for the State of Ohio request for approval of this iSIP. The public hearing for this package was held on June 5, 2013 in Columbus, Ohio. No oral or written comments were received.

I ask that USEPA complete the review of this package and take final action on the iSIP approval request for the State of Ohio. I believe that Ohio EPA complies with USEPA's guidance in determining that it has the authority to implement its

with USEPA's guidance in determining that it has the authority to implement its iSIP requirements with respect to SO2 and all the NAAQS.

This submittal consists of one (1) hard copy of the required documentation. An exact duplicate electronic version of the submittal in PDF format is available at <http://www.epa.ohio.gov/dapc/SIP/infrastructure>.

If you have any questions, please feel free to contact Jennifer Dines of the Division of Air Pollution Control (614-644-3696).

Sincerely,

Scott J. Nally  
Director
