

Submission of this form constitutes notice that the party identified in Section I of this form intends to be authorized to install/operate a source of air pollution according to the permit-by-rule provisions of OAC 3745-31-03(A)(4)(d). By submitting this form, the applicant agrees to operate and maintain the facility and equipment in accordance with the applicable permit-by-rule provisions. An original signature is needed and forms transmitted by fax will not be accepted. Complete all information as indicated by the instructions.

I. Applicant Information / Mailing Address

Company (Applicant) Name: _____

Mailing (Applicant) Address: _____

City: _____ State: _____ Zip Code: _____

Contact Person: _____ Phone: _____ Fax: _____ E-mail: _____

II. Facility / Site Location Information

Facility Name: _____

Facility Address / Location: _____

City: _____ State: _____ Zip Code: _____

Facility Contact: _____ Phone: _____ Fax: _____ E-mail: _____

Ohio EPA Facility ID Number (10-digit) if known - See Instructions: _____

III. Reason for Submitting Notification:

Initial request Equipment modification Ownership change

Request for revocation of current permit - complete additional information below

Permit to install (PTI) Number

Emission Unit ID (4-digit)

IV. Type of Material Being Processed (check all that apply)

Crushed stone Sand and gravel Soil Clay
Pumice Other, explain _____

V. Maximum Plant / Equipment Production Capacity - see Instructions: _____ tons per hour

VI. Plant / Equipment Foundation: Fixed Portable

VII. Dust Control Methods and Equipment (check all that apply):

Fabric filter Wet scrubber Water sprays Enclosed design Other, explain _____

I certify under penalty of law that all statements or assertions of fact made in this notification are true and complete, and shall subject the signatory to liability under state laws forbidding false or misleading statements.

Applicant Name (Print): _____ Title: _____

Applicant Signature: _____ Date: _____

RETAIN A COPY OF THIS FORM FOR YOUR RECORDS

Mail the original, signed form to the appropriate Air Permit Review Agency (District Office/Local Air Agency) for your county. (Please refer to the Agency map in the attached instructions for mailing addresses). Rev 12/10

For Ohio EPA Use Only:

FAC ID: _____
Date received _____

INSTRUCTIONS: Permit-by-Rule Supplemental Form Nonmetallic Mineral Processing Plants

GENERAL INSTRUCTIONS:

Provide complete responses to all applicable questions. Submittal of an incomplete form will delay review and processing. If you need assistance, contact your Ohio EPA District Office or Local Air Agency for assistance. Contact the Ohio EPA, Division of Air Pollution Control at (614) 644-2270 for more information on contacting your local district office or go to <http://www.epa.ohio.gov/dapc> and select the topic "District Offices and Local Air Agencies". For more information on the permit-by-rule process, including online tracking of your notification form, go to <http://www.epa.ohio.gov/dapc/pbr/permitbyrule.aspx>

This is a notification form for nonmetallic mineral crushing and/or screening equipment that is intended to be installed and/or operated according to the permit-by-rule provisions of OAC 3745-31-03(A)(4)(d). This permit-by-rule (PBR) provision is intended to cover all processing equipment (e.g., crushers, screens, conveyors, loading facilities, etc.) at the facility but does not cover other types of air pollution sources at the facility such as unpaved roadways, material storage piles, or diesel electrical generators which may require air pollution permits. For copies of these regulations, contact your Ohio EPA District Office or Local Air Agency. State regulations may also be viewed and downloaded from the Ohio EPA website at <http://www.epa.ohio.gov/dapc/regs/regs.aspx>

- I. Check the appropriate boxes for all types of materials to be processed. If checking "Other", provide an explanation of the material(s) being processed. Please note that processing "Other" materials may disqualify the operations from the PBR.
- II. "Maximum plant/equipment production capacity" means the cumulative manufacturer's rated capacity, in tons per hour, of all initial crushers that are part of the plant. To be eligible for the PBR, the maximum plant capacity must be 25 tons per hour or less for *fixed* sand and gravel, crushed stone, and recycled asphalt/concrete plants; 150 tons per hour or less for *portable* sand and gravel, crushed stone, and recycled asphalt/concrete plants, 10 tons per hour for common clay or pumice plants; and 150 tons per hour or less for *fixed and portable* soil screening plants. If the cumulative maximum capacity exceeds these thresholds, the operations are not eligible for PBR authorization to install or operate. Please complete a permit-to-install application (forms are available at <http://www.epa.ohio.gov/dapc/fops/eac/eacforms.aspx> under "Permits (Permit to Install and Permit to Operate)", or continue to operate in accordance with your existing permits if the operation has been previously permitted.
- III. Check "Fixed" if the processing equipment is attached by a cable, chain, turnbuckle, bolt or other means (except electrical connections) to any anchor, slab, or structure including bedrock. Check "Portable" if the equipment is mounted on any chassis or skids and may be moved by the application of a lifting or pulling force. In addition, there shall be no cable, chain, turnbuckle, bolt or other means (except electrical connections) by which any piece of equipment is attached or clamped to any anchor, slab, or structure, including bedrock that must be removed prior to the application of a lifting or pulling force for the purposes of transporting the unit.
- IV. Check the appropriate boxes which describe the dust control equipment or dust suppression methods to be used to control dust from the operations. If checking "Other", provide an explanation of the methods being employed.

Signature Requirements – This notification will be deemed incomplete if it is not signed by the appropriate signatory. Please see the following guidance at http://www.epa.ohio.gov/portals/27/title_v/respoff.pdf for more information on who is authorized to sign this form or contact your Ohio EPA District Office or Local Air Agency.

Permit-by-Rule Requirements: Nonmetallic Mineral Processing Plants

Excerpts from applicable sections of Ohio Administrative Code 3745-31-03(A)(4) are included with these Instructions for convenience. An owner or operator of a nonmetallic mineral processing plant which intends to install and/or operate according to the permit-by-rule provisions must comply with all applicable requirements specified in paragraphs (A)(4)(a) – General Provisions, and (A)(4)(d) – Nonmetallic mineral processing plants.

(4) Permit-by-rule exemptions

The following air contaminant sources are exempt from the requirement to obtain a permit to install. These exemptions are valid only as long as the owner or operator complies with all of the permit-by-rule general provisions, meets the qualifying criteria defined in the applicable permit-by-rule and complies with all of the requirements under the applicable permit-by-rule specific provisions. Upon request by the director, the owner or operator of a facility that has exceeded the permit-by-rule thresholds or that the director finds is causing or may cause a public nuisance in violation of rule 3745-15-07 of the Administrative Code shall submit an application for a permit to install.

These exemptions do not, however, exempt any air contaminant source from requirements of the federal Clean Air Act, including being considered for purposes of determining whether a facility constitutes a major source or is otherwise regulated under Chapter 3745-77 of the Administrative Code or any requirement to list insignificant activities and emission levels in a Title V permit application. In addition, this rule does not relieve the owner or operator from the requirement of including the emissions associated with the exempt sources into any major new source review permitting action.

(a) General provisions

These general provisions apply to all owner or operators who are utilizing one or more of the permit-by-rule exemptions listed in paragraphs (A)(4)(b) through (A)(4)(l).

(i) Recordkeeping requirements

The owner or operator shall collect and maintain the records described for each air contaminant source exempted under paragraph (A)(4) of this rule and these records shall be retained in the owner or operator's files for a period of not less than five years, unless otherwise specified in each exemption. These records shall be made available to the director or any authorized representative of the director for review during normal business hours.

(ii) Notification requirements for new installations

For the purposes of this paragraph, a new permit-by-rule air contaminant source is an air contaminant source installed after the promulgation date of any new applicable permit-by-rule or July 29, 2005, whichever comes later. The owner or operator of a new permit-by-rule air contaminant source electing to use an applicable permit-by-rule exemption shall submit a written notification in a form and manner prescribed by the director prior to installation of the air contaminant source. This notification, or form, shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency, and shall contain the following information:

(a) The owner or operator's and the facility contact's name;

(b) The facility mailing address and telephone number;

(c) The location of the air contaminant source(s);

(d) A description of the air contaminant source, including any pollution control(s); and

(e) A statement by the owner or operator that indicates which permit-by-rule applies to the air contaminant source.

(iii) Notification requirements for existing permitted sources

The owner or operator of an air contaminant source which is operating under an existing permit to install and/or permit to operate may continue to operate in compliance with that permit or may submit a written request to the Ohio EPA to revoke any such individual permit or permits and to allow the air contaminant source to operate under the permit-by-rule provisions. The director may revoke a permit to install and/or permit to operate if the permittee requests revocation, agrees to meet all permit-by-rule qualifying and operating conditions, and the director determines that the revocation will not result in the violation of any applicable laws. When a permittee requests a revocation pursuant to this paragraph, the director, without prior hearing, shall make a final determination on the request and inform the permittee in writing. If the director agrees with the request to operate under the permit-by-rule, then the permit-by-rule becomes applicable to the permittee on the date the existing permit to install and/or permit to operate are revoked.

(iv) Notification requirements for existing permit-by-rule sources

The owner or operator of an air contaminant source that is operating under one of the permit-by-rules that existed prior to July 29, 2005 (emergency electrical generators, injection and compression molding, crushing and screening plants, soil-vapor extraction and soil-liquid extraction) and desires to continue operating under the permit-by-rule shall submit a written notification which contains all of the elements required in paragraph (A)(4)(a)(ii) of this rule. This notification shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency and shall be submitted by July 29, 2006.

(v) Records retention requirements

Each record of any monitoring data, testing data, and support information required pursuant to a specific permit-by-rule shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the specific permit-by-rule. Such records may be maintained in computerized form.

(vi) Reporting requirements

The owner or operator shall submit required reports in the following manner:

(a) Reports of any monitoring and/or record keeping information required by a specific permit-by-rule shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency.

(b) Except as otherwise may be provided in a permit-by-rule specific reporting requirements paragraph of a specific permit-by-rule, a written report of any deviations (excursions) from emission limitations, operational restrictions, qualifying criteria, and control equipment operating parameter limitations that have been detected by the testing, monitoring, and record keeping requirements specified in the permit-by-rule shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency within thirty days of the date the deviation occurred. The report shall describe the specific limitation and/or operational restriction exceeded, the probable cause of such deviation, and any corrective actions or preventive measures that have been or will be taken.

(vii) Scheduled maintenance/malfunction reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of rule 3745-15-06 of the Administrative Code. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio environmental protection agency district office or local air agency in accordance with paragraph (B) of rule 3745-15-06 of the Administrative Code. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is served by such control system(s).

Note: Paragraphs (b) and (c) are omitted since they do not apply to the nonmetallic mineral processing plant PBR

(d) Nonmetallic mineral processing plants permit-by-rule

(i) Qualifications

A nonmetallic mineral processing plant, as defined under 40 CFR Part 60, Subpart OOO, that meets the following qualifications is eligible to use this permit-by-rule:

- (a) Fixed sand and gravel plants and crushed stone plants (including concrete and asphalt paving plants) with capacities, as defined in 40 CFR 60.671, of twenty-three megagrams per hour (twenty-five tons per hour) or less;
- (b) Portable stone and gravel plants and crushed stone plants (including concrete and asphalt paving plants) with capacities, as defined in 40 CFR 60.671, of one hundred thirty-six megagrams per hour (one hundred fifty tons per hour) or less;
- (c) Common clay plants and pumice plants with capacities, as defined in 40 CFR 60.671, of nine megagrams per hour (ten tons per hour) or less; and
- (d) Fixed and portable soil screening plants with capacities, as defined in 40 CFR 60.671, of one hundred thirty-six megagrams per hour (one hundred fifty tons per hour) or less.

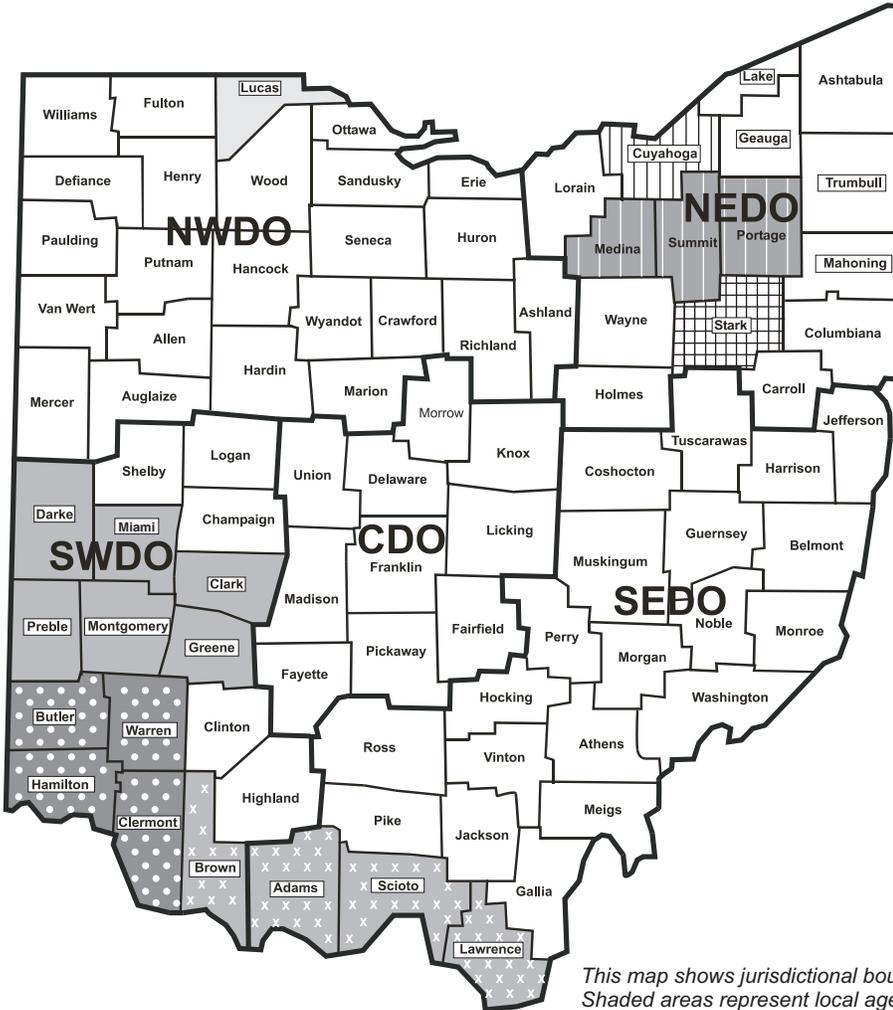

(ii) Requirements

A nonmetallic mineral processing plant identified in paragraph (A)(4)(d)(i) of this rule shall either employ a baghouse, wet scrubber, water sprays or combination thereof that is designed and operated to emit no more than ten per cent opacity from stack or fugitive emission points, or employ an enclosed design that is designed and operated to emit no more than fifteen per cent opacity from stack or fugitive emission points, and that maintain the following daily records:

- (a) Material throughput in tons per day; and
- (b) Pressure drop readings across the control device as applicable; and
- (c) Meter readings of quantities of water used for wet scrubbing and spray applications as applicable; and
- (d) Operating hours of the crushing and grinding equipment.
