

3745-400-01 Definitions.

As used in Chapters 3745-400 and 3745-37 of the Administrative Code:

- (A) "Applicant" means any person who has applied for a construction and demolition debris facility license in accordance with Chapters 3745-400 and 3745-37 of the Administrative Code.
- (B) "Assets" means all existing and all probable future economic benefits obtained or controlled by a particular entity.
- (C) "Aquifer system" means one or more geologic unit(s) or formation(s) that is/are wholly or partly saturated with water and is/are able to store, transmit, and yield significant amounts of water to wells or springs. For the purpose of this definition, "significant amounts of water" means the saturated geologic unit(s) or formation(s) is capable of yielding ground water at a time-weighted-average rate greater than one-tenth of a gallon per minute over a twenty-four hour period, except if that saturated geologic unit(s) or formation(s) meets all of the following:
 - (1) Yields less than three gallons per minute but greater than one-tenth of a gallon per minute.
 - (2) The ground water yield is less than fifty per cent of the yield of another saturated zone present under the facility.
 - (3) Which is the likely source of water used for any purpose within one mile of the facility.
- (D) "Board of health" means the board of health of a city or general health district, or the authority having the duties of a board of health in any city as authorized by section 3709.05 of the Revised Code.
- (E) "Clean hard fill" means construction and demolition debris which consists only of reinforced or nonreinforced concrete, asphalt concrete, brick, block, tile, and/or stone which can be reutilized as construction material. Brick in clean hard fill includes but is not limited to refractory brick and mortar. Clean hard fill does not include materials contaminated with hazardous wastes, solid wastes, or infectious wastes.
- (F) "Construction and demolition debris" or "debris" means those materials resulting from the alteration, construction, destruction, rehabilitation, or repair of any manmade physical structure, including, without limitation, houses, buildings, industrial or commercial facilities, or roadways. "Construction and demolition debris" does not include materials identified or listed as solid wastes, infectious wastes, or hazardous wastes pursuant to Chapter 3734. of the Revised Code and rules adopted under it; or materials from mining operations, nontoxic fly ash, spent nontoxic

foundry sand, and slag; or reinforced or nonreinforced concrete, asphalt, building or paving brick, or building or paving stone that is stored for a period of less than two years for recycling into a usable construction material.

For the purpose of this definition, "materials resulting from the alteration, construction, destruction, rehabilitation, or repair of any manmade physical structure," are those structural and functional materials comprising the structure and surrounding site improvements, such as brick, concrete and other masonry materials, stone, glass, wall coverings, plaster, drywall, framing and finishing lumber, roofing materials, plumbing fixtures, heating equipment, electrical wiring and components containing no hazardous fluids or refrigerants, insulation, wall-to-wall carpeting, asphaltic substances, metals incidental to any of the above, and weathered railroad ties and utility poles.

"Materials resulting from the alteration, construction, destruction, rehabilitation, or repair" do not include materials whose removal has been required prior to demolition, and materials which are otherwise contained within or exist outside the structure such as solid wastes, yard wastes, furniture, and appliances. Also excluded in all cases are liquids including containerized or bulk liquids, fuel tanks, drums and other closed or filled containers, tires, and batteries.

- (G) "Construction and demolition debris facility" or "facility" means any site, location, tract of land, installation, or building used for the disposal of construction and demolition debris.

[Comment: For the purposes of siting a new construction and demolition debris facility, rule 3745-400-06 of the Administrative Code requires that the entire facility, not merely the limits of construction and demolition debris placement, be located in areas not prohibited by statute.]

- (H) "Construction and demolition debris facility license" or "license" means a license issued by the licensing authority in accordance with Chapter 3714. of the Revised Code and rules adopted thereunder.

- (I) "Construction and demolition debris facility operator" or "operator" means the person responsible for the on-site supervision of technical operations and maintenance of a construction and demolition facility, or any parts thereof, which may affect the performance of the facility and its potential environmental impact and/or any person who has authority to make discretionary decisions concerning the daily operations of the construction and demolition debris disposal facility.

- (J) "Current assets" means cash or other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.
- (K) "Current liabilities" means obligations whose liquidation is reasonably expected to require either the use of existing resources properly classifiable as current assets or the creation of other current liabilities.
- (L) "Developed spring" means any spring which has been permanently modified by the addition of pipes or a collection basin to facilitate the collection and use of the spring water.
- (M) "Director" means the director of environmental protection.
- (N) "Disposal" means the discharge, deposit, injection, dumping, spilling, leaking, emitting, or placing of any construction and demolition debris into or on any land or ground or surface water or into the air, except if the disposition or placement constitutes storage, reuse, or recycling in a beneficial manner.
- [Comment: any debris material reused, or processed for recycling or for production or incorporation into a product, is not regulated until it is disposed, at which time its disposal may be regulated under either Chapter 3714. or 3734. Of the Revised Code, as appropriate.]
- (O) "Existing facility" means a construction and demolition debris facility that was in operation or under construction on September 30, 1996.
- (P) "Ground water" means any water below the surface of the earth in a zone of saturation.
- (Q) "Hazardous wastes" means waste that is listed specifically as hazardous waste and/or exhibits one or more characteristics of hazardous waste as defined in Chapter 3745-51 of the Administrative Code.
- (R) "Health commissioner" means the individual occupying the office created by sections 3709.11 and 3709.14 of the Revised Code, or his authorized representative.
- (S) "Illegal disposal" means the disposal of construction and demolition debris at any place other than a construction and demolition debris disposal facility operated in accordance with Chapter 3714. of the Revised Code, and Chapters 3745-400 and 3745-37 of the Administrative Code a solid waste disposal facility operated in accordance with Chapter 3745-27 of the Administrative Code, and licensed in accordance with Chapter 3745-37 of the Administrative Code, or as otherwise authorized by this Chapter.

- (T) "Independently audited" refers to an audit performed by an independent certified public accountant in accordance with generally accepted accounting standards.
- (U) "Initial license" means the first license issued by the licensing authority for a facility under Chapter 3714. of the Revised Code.
- (V) "Leachate" means liquid that has come in contact with or been released from construction and demolition debris.
- (W) "Liabilities" means probable future sacrifices of economic benefits arising from present obligations to transfer assets or provide services to other entities in the future as a result of past transactions or events.
- (X) "Limits of construction and demolition debris placement" means the areal and vertical limits of debris placement within the construction and demolition debris facility and includes the volume of debris placement. The limits of construction and demolition debris placement include the following:
- (1) "Construction and demolition debris facility active areas" or "active licensed disposal areas" means all areas within the limits of construction and demolition debris placement designated by the owner or operator in a license application for debris placement during the licensure period.

All areas within the limits of construction and demolition debris placement in which debris has been placed since September 30, 1996, and which have not been capped and dense vegetative cover established.
 - (2) "Construction and demolition debris facility inactive areas" or "inactive licensed disposal areas" means all remaining areas within the limits of construction and demolition debris placement which are not designated for debris placement during the licensure period, and include but are not limited to the following:
 - (a) Areas in which no construction and demolition debris has yet been placed.
 - (b) Areas within the limits of construction and demolition debris placement in which debris has been placed since September 30, 1996, and which have been capped, dense vegetative cover established, and certification of the completion of these activities submitted to the licensing authority in accordance with rule 3745-400-12 of the Administrative Code.
 - (c) Areas within the limits of construction and demolition debris placement in which

debris has been placed prior to September 30, 1996, and where no debris placement has occurred after that date.

- (Y) "Licensing authority" means a city or general health district as created by or under authority of Chapter 3709. of the Revised Code, which is on the approved list in accordance with section 3714.09 of the Revised Code; or the director where the health district is not on the approved list.
- (Z) "Net working capital" means current assets minus current liabilities.
- (AA) "Net worth" means total assets minus total liabilities and is equivalent to owner's equity.
- (BB) "Nuisance" means anything which is injurious to human health or offensive to the senses; interferes with the comfortable enjoyment of life or property; and affects a community, neighborhood, or any considerable number of persons (although the extent of annoyance or damage inflicted upon individual persons may be unequal).
- (CC) "Parent corporation" means a corporation, or the ultimate corporation, which directly owns at least fifty per cent of the voting stock of the corporation which holds a construction and demolition debris facility license issued in accordance with Chapters 3745-37 and 3745-400 of the Administrative Code; the latter corporation is deemed a "subsidiary" of the parent corporation.
- (DD) "Person" includes the state, any political subdivision of the state or other state or local body, the United States and any agency or instrumentality thereof, and any legal entity or organization defined as a person under section 1.59 of the Revised Code.
- (EE) "Property owner" or "owner" means the person who holds title to the property on which the construction and demolition debris disposal facility is located.
- (FF) "Public water supply well" means any well connected to a public water system as defined by rule 3745-81-01 of the Administrative Code.
- (GG) "Public well field" means any system of wells which is connected to a public water system as defined by rule 3745-81-01 of the Administrative Code.
- (HH) "Qualified ground water scientist" means a scientist or engineer who has received a baccalaureate or post-graduate degree in the natural sciences or engineering and has at least five years relevant experience, in ground water hydrogeology and related fields, to enable that individual to make sound professional judgements regarding ground water monitoring, contaminant fate and transport, and corrective measures.

- (II) "Recycling" means processing a material using such methods, including but not limited to, screening, sorting, or shredding, for use in a beneficial manner that does not constitute disposal.
- (JJ) "Regional aquifer system" means the aquifer used as a primary source of water to wells within one mile of the construction and demolition debris disposal facility.
- (KK) "Regulatory flood plain" means a watercourse and the areas adjoining a watercourse which have been, or may be, covered by a one-hundred-year flood as depicted on a federal insurance administration flood map.
- (LL) "Reuse" means reincorporating a material as part of a structure and does not include reincorporating a material as fill.
- (MM) "Significant zone of saturation" means a part of the earth's crust, excluding the capillary zone, in which all voids are filled with water and which may act as a preferential pathway of migration away from the limits of construction and demolition placement.
- (NN) "Solid wastes" means such unwanted residual solid or semisolid material as results from industrial, commercial, agricultural, and community operations as defined in rule 3745-27-01 of the Administrative Code.
- (OO) "Storage" means the holding of debris for a temporary period in such a manner that it remains retrievable and substantially unchanged and, at the end of the period, is disposed, reused, or recycled in a beneficial manner.
- (PP) "Surface water" means any water on the surface of the earth.
- (QQ) "Tangible net worth" means the tangible assets that remain after deducting liabilities; such assets would not include such intangibles as goodwill and rights to patents or royalties.
- (RR) "Water pollution" means the unpermitted release of sediment from disturbed areas, construction and demolition debris, or leachate to the waters of the state.
- (SS) "Waters of the state" means all streams, lakes, ponds, marshes, watercourses, waterways, wells, springs, irrigation systems, drainage systems and all other bodies or accumulations of water, surface and underground, natural or artificial, regardless of the depth of the strata in which underground water is located, which are situated wholly or partly within, or border upon, this state, or are within its jurisdiction, except those private waters which do not combine or effect a junction with natural surface or underground waters as defined in Chapter 6111. (Water pollution control) of the Revised Code.

(TT) "Working face" means that portion of a construction and demolition debris disposal facility where construction and demolition debris is placed for final deposition.
