**** REMINDER: ** Consumer Confidence Report (CCR) is due July 1, 2019**

Chemicals

Monitoring Requirements

TOTAL MICROCYSTINS

1 Sample Set Required WEEKLY*

Total microcystins sample set refers to one raw source water sample at LT2001 and one finished water sample at EP001. A week is defined as Sunday through Saturday.

**Weekly sampling unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at <http://epa.ohio.gov/ddagw/HAB.aspx>. Reduced monitoring is contingent on a public water system continuing to experience NO raw or finished water total microcystins detections. Any total microcystins detections during routine (weekly) or reduced sampling will trigger additional sampling. Please refer to the website above for specifics on follow-up sampling requirements.*

Cyanobacteria screening sample is to be collected biweekly from raw source water at sample point LT2001 unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at <http://epa.ohio.gov/ddagw/HAB.aspx>. As of 12/31/17, all public water systems are responsible for contracting with a lab certified to perform cyanobacteria screening (qPCR). Please review the website for further information pertaining to follow-up sampling requirements for cyanobacteria screening gene detections, and certified labs that can perform analysis.

Monitoring Requirements

TOTAL COLIFORM - SEASONAL STARTUP

At least 1 negative Total Coliform
Bacteria sample prior to serving
water to the public

*** Seasonal start-up sample does not count for routine compliance requirements. Collect at least one special purpose (SP) sample for total coliform (TC) analysis at the service connection considered to be most susceptible to contamination. The sample must be TC negative before the system may serve water to the public. If the sample is positive, contact your Ohio EPA District Representative for additional requirements. If your start date is different from last year, please contact your Ohio EPA District Representative.***

water to the public

*** Seasonal start-up sample does not count for routine compliance requirements. Collect at least one special purpose (SP) sample for total coliform (TC) analysis at the service connection considered to be most susceptible to contamination. The sample must be TC negative before the system may serve water to the public. If the sample is positive, contact your Ohio EPA District Representative for additional requirements. If your start date is different from last year, please contact your Ohio EPA District Representative.***

Where to Collect Samples For a Small Public Water System

Monitoring Requirements

TOTAL COLIFORM - SEASONAL STARTUP

At least 1 negative Total Coliform
Bacteria sample prior to serving
water to the public

***** Seasonal start-up sample does not count for routine compliance requirements. Collect at least one special purpose (SP) sample for total coliform (TC) analysis at the service connection considered to be most susceptible to contamination. The sample must be TC negative before the system may serve water to the public. If the sample is positive, contact your Ohio EPA District Representative for additional requirements. If your start date is different from last year, please contact your Ohio EPA District Representative.*****

Where to Collect Samples For a Small Public Water System

Failing to sample for total coliform or nitrate will cost you \$150 or more in penalties for each monitoring violation. A list of drinking water sample collection services that can assist you with collecting water samples is located at: <http://epa.ohio.gov/portals/28/documents/PWS/DWSample.pdf>.

water to the public

*** Seasonal start-up sample does not count for routine compliance requirements. Collect at least one special purpose (SP) sample for total coliform (TC) analysis at the service connection considered to be most susceptible to contamination. The sample must be TC negative before the system may serve water to the public. If the sample is positive, contact your Ohio EPA District Representative for additional requirements. If your start date is different from last year, please contact your Ohio EPA District Representative.***

Where to Collect Samples For a Small Public Water System

Failing to sample for total coliform or nitrate will cost you \$150 or more in penalties for each monitoring violation. A list of drinking water sample collection services that can assist you with collecting water samples is located at: <http://epa.ohio.gov/portals/28/documents/PWS/DWSample.pdf>.
